SCI Seoul Crypto Institute

SCI Membership Guide

Seoul Crypto Institute

SCI Secretariat · November 6, 2026

I. About SCI

The Seoul Crypto Institute (SCI) aims to be the intellectual and practical hub for translating Korea's industrial competitiveness into the rules of international trade and capital markets. Digital assets are an instrument rather than an objective: the means by which Korean industrial competitiveness is carried into, and connected with, the international system.

To this end, SCI researches and proposes institutional reform along three axes.

- **Axis 1 · Manufacturing and Trade** A neutral trade settlement infrastructure for AI-coordinated supply chains and a mechanism for the cross-border use of intellectual property
- **Axis 2 · Capital Markets** Full authorization of tokenized securities, building toward a comprehensive tokenized securities platform
- **Axis 3 · Digital Asset Infrastructure** Legal foundations for issuance, custody, and liquidity

SCI is a think-and-do tank integrating theory, practice, and policy: not a research institute alone, but a community of practitioners that brings about change. It works through two standing bodies, the Research Council and the Advisory Council, and through Industry Councils convened as projects on specific issues.

- **Research Council** Experts in policy, law, finance, technology, media, and academia develop the analytical basis and policy options for Korea to take a leading position, and research and pursue policy development, the enactment and amendment of laws, and regulatory improvement toward a framework receptive to digital assets
- **Advisory Council** Former senior regulators, protocol foundations, international venture investors, industry associations, and think tanks review alignment with international standards and connect SCI to global networks
- **Industry Council for Regulatory and Policy Improvement** Brings industry together to identify sector-specific obstacles, propose institutional and policy improvements, and carry out proof-of-concept (PoC) programs

II. Membership Categories and Annual Fees

Individual and Corporate Members alike are full members with voting rights in the General Assembly.

Category	Eligibility	Annual fee
Individual Member	Individuals who share SCI's purpose and wish to take part in and support it as members	**USD 200**
Corporate Member	**Korean and foreign companies operating in the Korean market** Firms in fields such as manufacturing, trade, finance, securities, content and culture, exchanges, and blockchain technology that face the constraints of current rules directly in their operations	**USD 1,000**

Note: SCI will provide payment details once the application is approved.

III. Member Benefits

- **Priority access** Receive priority access to SCI newsletters and research reports
- **Priority admission** Receive priority admission to SCI seminars, conferences, and workshops
- **General Assembly** Attend and vote at the General Assembly, SCI's supreme deliberative body
