SCI Sponsorship Guide

Seoul Crypto Institute

SCI Secretariat · November 6, 2026

I. Principles

The Seoul Crypto Institute (SCI) welcomes contributions from those who share its purpose. Contributions support its research, education, and policy, regulatory, and legislative proposals.

- **Unrestricted contributions** Contributions may not be tied to any specific SCI activity
- **Research independence** Contributions are not conditioned on any particular research conclusion. Supporters may propose research and education topics, but they take no part in determining the conclusions of research or the content of SCI's policy recommendations
- **Commissioned research** Funding tied to a specific research project is treated as commissioned research, not as a contribution, and is arranged separately. The principle of research independence applies to commissioned research as well
- **Contribution cap** No single supporter, individual or corporate, may account for more than 30 percent of SCI's total contributions in any year, measured at year-end
- **Funding disclosure** SCI discloses the composition of its funding, together with the scale of principal contributions, in its annual report

II. Who Can Give

Any individual or organization that shares SCI's purpose may become a supporter; membership in SCI, as an individual or corporate member, is not required. Supporters belong to SCI's Development Committee, the body that brings together its corporate and individual supporters.

III. Supporter Tiers and Annual Contributions

Tier	Annual contribution (KRW)	USD
Platinum Supporter	**KRW 300 million** (300,000,000)	**USD equivalent** of the KRW amount, at the reference exchange rate on the invoice date
Gold Supporter	**KRW 100 million** (100,000,000)	
Silver Supporter	**KRW 30 million** (30,000,000)

Briefings on the Industry Councils' regulatory and policy reform work, with the opportunity to comment	●	●	●

Note: Industry Councils are described in VI. The detailed terms of each benefit are set out in V, Benefits by Tier.

V. Benefits by Tier

Platinum Supporter KRW 300 million a year, or the USD equivalent

- **Priority admission** Receive priority admission to all educational programs and seminars hosted by SCI
- **Closed-door meetings** Receive invitations to closed-door meetings held through SCI's channels of dialogue with government, the National Assembly, industry, and academia
- **Research and regulatory reports** Receive SCI research reports in the supporter's areas of interest ahead of public release, along with regulatory update reports
- **Research, education, and seminar proposals** Propose one topic a year for research, an educational program, or a seminar, and take part as a speaker or discussant. SCI decides the final topic, taking into account the supporter's proposal and what will best advance institutional reform
- **Policy and legislative research proposals** Propose one policy or legislative topic a year within SCI's fields of research. SCI agrees on the final topic with the supporter, and the supporter receives the resulting SCI research report ahead of public release. The topic must serve the development of the industry as a whole, not any single company
- **Proposals for new Industry Councils** Propose a new Industry Council on a specific regulatory or policy issue, such as the stablecoin ecosystem or the tokenization of equities. SCI decides whether to establish it and how it is formed and run, and may combine similar proposals into a single Industry Council. It weighs the relevance of the proposed issue to the development of the industry and the wider ecosystem, and informs the supporter of its decision. Once the Industry Council is established, the supporter may sit on its Council Steering Committee
- **Council Steering Committees** Sit on the Council Steering Committees of up to three Industry Councils
- **Industry Council participation** Take part in the deliberations and other work of up to three Industry Councils
- **Topic suggestions** Suggest research and education topics to the Industry Councils
- **Briefings and comment** Receive briefings on the Industry Councils' regulatory and policy reform work, and have the opportunity to comment on it

Gold Supporter KRW 100 million a year, or the USD equivalent

- **Priority admission** Receive priority admission to all educational programs and seminars hosted by SCI
- **Closed-door meetings** Receive invitations to closed-door meetings held through SCI's channels of dialogue with government, the National Assembly, industry, and academia
- **Research and regulatory reports** Receive SCI research reports in the supporter's areas of interest ahead of public release, along with regulatory update reports
- **Research, education, and seminar proposals** Propose one topic a year for research, an educational program, or a seminar, and take part as a speaker or discussant. SCI decides the final topic, taking into account the supporter's proposal and what will best advance institutional reform
- **Council Steering Committees** Sit on the Council Steering Committees of up to two Industry Councils
- **Industry Council participation** Take part in the deliberations and other work of up to two Industry Councils
- **Topic suggestions** Suggest research and education topics to the Industry Councils
- **Briefings and comment** Receive briefings on the Industry Councils' regulatory and policy reform work, and have the opportunity to comment on it

Silver Supporter KRW 30 million a year, or the USD equivalent

- **Priority admission** Receive priority admission to all educational programs and seminars hosted by SCI
- **Closed-door meetings** Receive invitations to closed-door meetings held through SCI's channels of dialogue with government, the National Assembly, industry, and academia
- **Research and regulatory reports** Receive SCI research reports in the supporter's areas of interest ahead of public release, along with regulatory update reports
- **Industry Council participation** Take part in the deliberations and other work of one Industry Council
- **Topic suggestions** Suggest research and education topics to the Industry Councils
- **Briefings and comment** Receive briefings on the Industry Councils' regulatory and policy reform work, and have the opportunity to comment on it

VI. About SCI's Industry Councils

- **Industry Council for Regulatory and Policy Improvement** SCI's body for identifying the institutional and policy requirements of markets and firms. It is convened on a project basis, as separate Industry Councils on specific issues, rather than as a standing body. The Industry Councils uncover the operational obstacles each industry faces and run proof-of-concept (PoC) programs. Each Industry Council takes up a specific issue that firms in manufacturing and trade, finance and capital markets, or digital assets and technology want resolved, and whose resolution will help the digital asset ecosystem develop

  Examples include the Industry Council on Agentic Trade and Stablecoin Use, the Industry Council on Capital Market Tokenization, and the Industry Council for Foreign Digital Asset Firms in Korea. Each Industry Council has its own Council Steering Committee, separate from SCI's Steering Committee

- **Council Steering Committees** Each Council Steering Committee comprises the Secretariat, the relevant Research Fellows of the Research Council, advisers, and Platinum and Gold Supporters. It receives and discusses recommendations, including policy and legislative proposals, from the members, supporters, and experts taking part in the Industry Council, and passes its conclusions to SCI's Research Council
